

Rafael Caporali

Senior Full-Stack Developer · Node.js/TypeScript · QA and Technical Leadership

Belo Horizonte, Brazil · +55 31 99196-2016 · rafaelhon@gmail.com · linkedin.com/in/faelcaporali
· github.com/FaelCaporali

SUMMARY

Senior full-stack developer grounded in Node.js/TypeScript (React, Express, tRPC, Prisma, AWS), with a path that started in QA and grew into technical leadership. Over the last three years I shipped an AI-agent platform for WhatsApp customer service, an AI-assisted construction planner, and the re-platforming of a device trade-in system — from requirements to deployment, coordinating teams of three to five. Before tech, ten years running my own businesses, which shapes how I weigh product, cost, and priority. Bilingual Portuguese/English.

SKILLS

Languages	TypeScript, JavaScript, Node.js, Python, SQL
Frontend and mobile	React, Vite, React Native/Expo, Redux Toolkit, RTK Query, Tailwind, shadcn/Radix UI, Ant Design
Backend and data	Express, tRPC, OpenAPI, Prisma, Sequelize, Laravel, FastAPI, PostgreSQL (pgvector), MySQL/MariaDB, Redis
Applied AI	Conversational agents for WhatsApp (Evolution API), RAG and embeddings, OpenAI and Anthropic SDK, LangChain, n8n/Flowise, agent evaluation, AI-DLC methodology (AWS)
Cloud and DevOps	AWS (ECS, RDS, ALB, Lambda, CloudFormation, CodeBuild), GCP with Terraform, Docker/Swarm, Traefik, GitHub Actions, Serverless Framework, monorepos (Nx)
Quality and observability	Cypress, Cucumber/Gherkin, Playwright, Jest, Vitest, Testing Library, Datadog, Sentry, GrowthBook/OpenFeature
Management	Solution architecture, technical leadership, requirements analysis and blueprints, PO/PM duties, hiring, product pricing

PROFESSIONAL EXPERIENCE

Marketing para Cartórios – AI (D-Rocket group) · Tech Lead and Full-Stack Engineer · Jan 2026 – Sep 2026 contract

- Designed and built a multi-tenant AI-agent platform serving Brazilian notary offices over WhatsApp: Node/TypeScript monorepo with Express + tRPC (and OpenAPI), React/Vite, Prisma on PostgreSQL with pgvector, Redis, self-hosted Evolution API, n8n, and OpenAI for chat, embeddings, and audio transcription.
- Set up GitHub Actions CI/CD with unit, integration, and E2E tests (Jest, Vitest, Playwright) and deployment on Docker Swarm with Traefik and CloudFormation.
- Designed the RAG knowledge base and an internal agent-evaluation tool (scenarios, personas, scoring); modeled token-based billing and compliance with CNJ Provision 213/2026.
- Defined stack, pricing, and roadmap with the founder and PO; coordinated a team of five and supported the client's PO and QA as they grew into their roles.

BID Tecnologia · Technical Consultant and Tech Lead · contract Nov 2025 – Jul 2026

- Took over the legacy of five Lovable-generated MVPs for a device trade-in platform and re-platformed them into a React/TypeScript monorepo with PostgreSQL and RLS multi-tenancy, CI/CD, Terraform on GCP, and test coverage with Vitest and Testing Library.
- Brought the WMS module (receiving, triage, inventory) into operation as an internal tool and integrated the GestãoClick ERP, WhatsApp (Evolution API), n8n, and Telegram.
- Prototyped and validated a trade-in pricing agent with the Anthropic SDK (vision plus web search) covering photo → identification → pricing → offer.

La Fabrique Flottante (software house) · QA Engineer, then Tech Lead · contract

Jan 2025 – Dec 2025

- As Tech Lead (Apr–Dec 2025), owned engineering across the studio's projects: Beamble, Dalegig, and Everywhr.
- **Beamble** (live video shopping, French client, iOS and Android apps): coordinated the team across the API (Laravel), React Native app, and CRM; architected the AWS infrastructure (ECS, RDS, ALB via CloudFormation), the migration from legacy to microservices, and logistics integrations with Uber, UPS, and DHL, working directly with the client.
- **Dalegig** (marketplace matching musicians with gig bookers): built the React frontend and the AI matching and onboarding engine (n8n/Flowise).
- **Everywhr** (villa bookings, Stripe + Hostaway): restructured the infrastructure and the AI agent, with backend and frontend fixes.
- As QA Engineer (Jan–Apr 2025), owned quality for Beamble: mobile and web release validation and defect triage.

Brickup (construction tech) · QA Manager and Tech Lead · contract

Jun 2023 – Present

- Joined as QA Engineer and moved on to coordinate a team of five developers; ran hiring processes and trained the QA who took over the role.
- Introduced feature flags (GrowthBook/OpenFeature) and Datadog RUM monitoring, which brought open bugs from roughly 300 to under 100 and retired the biweekly "bug smash" ritual.
- Developed, with two engineers from PHD Engenharia (partner and investor), **Prévia**, an AI-assisted physical and budget planner for construction: React/TypeScript monorepo with an Expo/React Native mobile app, n8n + LangChain agents, and CI/CD pipelines with quality gates and AWS deployment.
- Designed and implemented the "Constructo" AI module in the web app (React, Redux Toolkit) and the internal integrations service (Python/FastAPI on AWS Lambda) with HubSpot, Asaas, and Datadog; wrote specs and blueprints for the billing and financial services as requirements analyst.
- Automated E2E tests with Cypress + Cucumber/Gherkin and acted as release gate for the backend, reviewing and merging the team's PRs.

Earlier experience

2009 – 2022

- **Entrepreneur**: founded and ran my own businesses — SUP LagoaSanta (water sports), a bakery, a hostel, and a sailing school.
- **Immersus Language School — Financial Coordinator (2013 – 2017)**: financial administration, planning with the board, and VBA-based BI automation.

SELECTED PROJECTS

- **flowgraph** — platform for deterministic customer-service agents with a provider-agnostic AI layer (TypeScript, Express, Prisma).
- **cam-backup** — multi-tenant SaaS for cloud CCTV backup (TypeScript, Prisma, pg-boss queues, AWS CDK).
- **claude-code-cli-adapter** — HTTP server exposing the Anthropic Messages API over the Claude Code CLI (Bun, Hono, Zod).

EDUCATION

Trybe — Full-Stack Web Development · 2022 – 2023

SEBRAE — Business Administration · 2006 – 2009

LANGUAGES

Portuguese — native

English — fluent; literate in both languages since childhood

Spanish — basic
